

Founded in 1994 with a vocation for the design of bridges and structures, **PEDELTA** has grown progressively with the number and size of projects undertaken as well as the number of employees and offices of the firm, always maintaining the highest criteria for the quality of its services.

The management of the company has implemented a quality management system and Environment, incorporating a Policy that provides a framework for establishing and reviewing quality objectives in **PEDELTA**, giving high priority to customer satisfaction, the quality of work and respect for the environment within the framework of sustainable development

Its policy is based on the design of projects, the elaboration of studies and reports as well as site supervision for civil and building engineering projects to the highest quality, satisfying all applicable legislation, norms and codes as well as the full scope of works dictated by the client according to the contract; always complying with the environmental legislation in force and the environmental requirements by the firm.

Scope:

- Feasibility studies and/or preliminary design alternatives
- Structural evaluation studies
- Detailed tender design, rehabilitation, structural repair and R&D projects
- Project design revision
- Bridge and structural inspections and management
- Technical assistance and project site supervision

The firm therefore is committed to:

- Understand the quality and environmental management as fundamental strategic elements to enhance the functioning of the firm.
- Develop an innovative and creative environment for the engineering design in order to contribute to solving the challenges of the society.
- Offer professional services in consulting engineering where the relationship between quality and price adapts to the needs, requirements and expectations of its clients with the aim of maximising their satisfaction and trust.
- Develop solutions that respect the environment as well as the social and cultural context of the structures.
- Comply with the norms EN ISO 9001 and EN ISO 14001 as well as any other established legal and normative requirement.
- Endorse the selection of subcontractors and suppliers that apply a quality and environmental management system.
- Promote in its employees a sense of responsibility with respect to the services towards the client, the quality of their work and a conscience towards the environment providing an adequate training for the development of their professional career and motivating them to continuously improve their capabilities.
- Take all possible means within our scope to prevent any contamination, avert accidents that can cause environmental damages or minimize their effect.
- Control and evaluate the continuous improvement of the quality and the environmental conduct of the firm.
- Assign the adequate resources to maintain and improve the system in the firm.
- Publicly display this policy within the firm.

All this will assure the future of the firm based on quality services, trust and respect towards the environment in its pursuit for professional excellence.
